# [Issue Descriptions]: How to Show Virtual Keyboard on Windows 10

First method
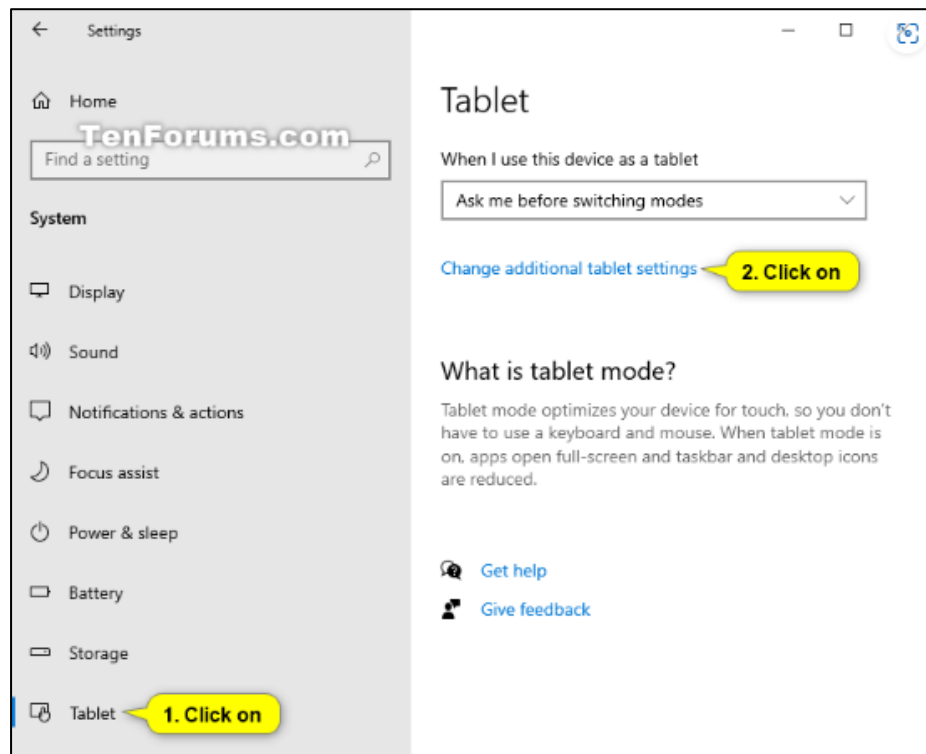

1. Open Settings, and click on Devices.

2. Choose Typing on the left side, and turn on "Show the touch keyboard when not in tablet mode and there's no keyboard attached" under the Touch Keyboard sub-menu.

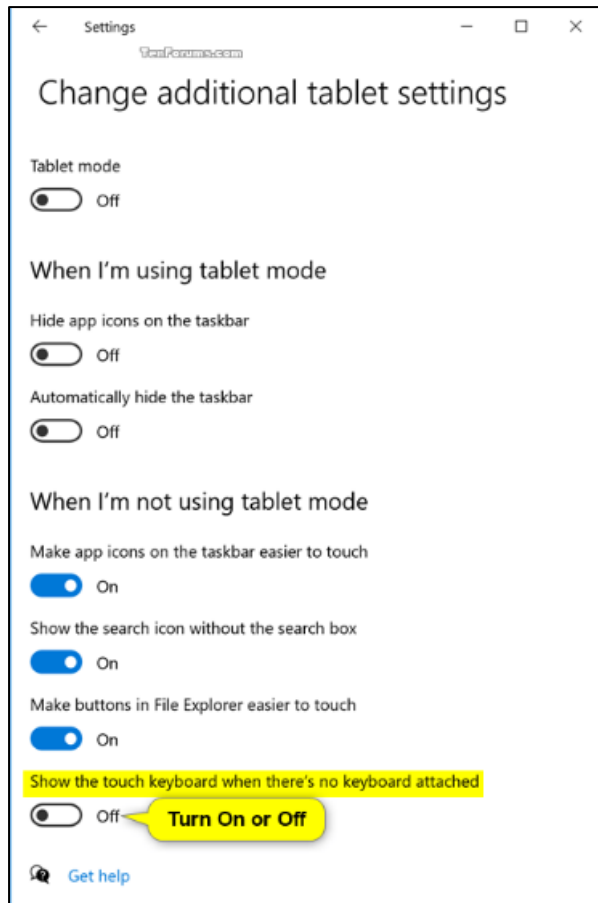

3. Save the changes and exit.

Second method

1. Open Settings, and click on the System icon.

2. Choose Tablet on the left side, and click on the

Change additional tablet settings on the right side.

3. Turn on "Show the touch keyboard when there's

no keyboard attached" under When I'm not using

tablet mode sub-menu.

4. Save the changes and exit.
